- **Cross Sub-Funds investments** - As at 31 December 2020, the value of the investments made by sub-funds in other sub-funds of the SICAV amounts to EUR 76,559,416,888.00 corresponding to 1,19% of the total net asset value. Therefore, the total combined NAV at the period end without those cross investments would amount to EUR 75,649,675,061.00.
- **Securities portfolio** - Transferable securities listed on a Stock Exchange or on a regulated market are valued at their last known price. When these prices are not representative or when securities are not listed, they are valued at their reasonably probable realisation value, determined with care and in good faith by the Board of Directors.
- **Conversion of items expressed in foreign currencies** - The Fund's financial statements are expressed in Euro (EUR). Net assets of each sub-fund expressed in foreign currencies are therefore converted and combined in EUR at the exchange rate in force at the close of the financial period. Transactions and acquisition costs for portfolio securities expressed in foreign currencies are converted into the accounting currency of the sub-fund concerned at the exchange rate in force on the date of transaction or acquisition, as appropriate. Valuation values for securities in the portfolio and of other assets and liabilities expressed in foreign currencies are converted into the accounting currency of the sub-fund at the exchange rate in force at the end of the financial period. Currency differences resulting from these conversions are recorded in the Statement of Operations and Changes in Net Assets.
- **Return on investments** - Dividends are entered as yields on the date when they are declared and in so far as the appropriate information can be obtained by the Fund. Interest is accrued on a daily basis.
- **Distribution of costs and expenses** - Each sub-fund is charged with costs or expenses specifically attributable to it. Costs and expenses not attributable to a specific sub-fund are distributed between the sub-funds on an equitable basis, in proportion to their respective Net Assets.
- **Repurchase agreements** - Repurchase agreements (Repos) are equivalent to borrowings guaranteed by underlying assets presented in the securities portfolio of the sub-fund which remains exposed to market risk. Reverse Repurchase agreements (Reverse Repos) are similar to guaranteed loans. In this case, the sub-fund is not subject to the risk of depreciation in the value of the underlying assets. Repos and Reverse Repos are regarded as borrowings and loans, respectively, of the sum of liquid assets received and/or paid.
- **Futures contracts** - Unexpired futures contracts are valued at their last known price on the date of valuation or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets.
- **Futures-style options contracts** - Futures-style options contracts are valued at the quoted price available on an official stock exchange (following the pricing policy as described above under "Valuation of investments"). Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cash-flows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of open options contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction. Net unrealised appreciations or depreciations on futures-style options contracts are recorded in the Statement of Net Assets. Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded in the Statement of Operations and Changes in Net Assets.
- **Forward foreign exchange contracts** - Unexpired forward foreign exchange contracts are valued at the exchange rates applicable on the valuation date or on the closing date and unrealised appreciations or depreciations resulting from them are recorded in the Statement of Net Assets. In the Cash sub-funds, the unexpired forward foreign exchange contracts are valued with the linearisation method.
- **Valuation of options and swaptions** - Options officially listed on a stock market or any other regulated market, operating in a regular manner, recognised and open to the public, are valued on the basis of their closing prices on the valuation day or, in the absence of such prices, on the basis of the last-known prices available. If these last-known prices are not representative, the valuation will be based on the probable realisation value estimated by the Board of Directors with prudence and in good faith. Currency options are valued at the market value.
- **Swaps** - The Fund is authorised to enter into volatility swaps, correlation swaps, credit default swaps, total return swaps, inflation swaps, asset swaps, interest rate swaps or currency swaps. Except for the interest rate swaps included in the Net Asset Value of the Cash EUR and Cash USD sub-funds, interest rate swaps, volatility swaps, correlation swaps, variance swaps, credit default swaps, total return swaps, inflation swaps and currency swaps are recorded at market value based on the valuation elements laid down in the contracts. In the Cash sub-funds, the unexpired swaps contracts are valued with the linearisation method. The unrealised net gain is included in the item "Unrealised net appreciation on swaps and CFD" in the Statement of Net Assets and the unrealised net loss is included in the item "Unrealised net depreciation on swaps and CFD" in the Statement of Net Assets.
- **Money market instruments** - The money market is a financial instrument with high liquidity and very short maturities. It is used by participants as a means for borrowing and lending in the short term, with maturities that usually range from overnight to just under a year. For the money market instruments, the accretion (difference between cost and amortised value), is reported under "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements" for securities held. If the instruments have been sold or reimbursed, this result is considered as "Net realised profit/(loss) on securities sold".
- **Mortgage related securities - To Be Announced securities (TBAs)** - TBA positions refer to the common trading practice in the mortgage backed securities market in which a security is to be bought from a mortgage pool (e.g. Ginnie Mae, Fannie Mae or Freddie Mac) for a fixed price at a future date. At the time of purchase the exact security is not known, but the main characteristics of it are specified. Although the price has been established at the time of purchase, the principal value has not been finalised. TBA positions are disclosed in the Securities Portfolio. The purchase of this type of security has not been settled and as a consequence, the amount corresponding to the payable due when the transaction is settled, is disclosed under "Brokers payable" in the Statement of Net Assets. The realised profits/(losses) on TBAs and changes in unrealised appreciation/depreciation are disclosed in the Statement of Operations and Changes in Net Assets respectively under the headings "Net realised profit/(loss) on securities sold" and "Net change in unrealised appreciation/(depreciation) on investments and on debts derived from reverse repurchase agreements".

- **“Net realised profit/(loss) on securities sold”** - The “Net realised profit/(loss) on securities sold” figure of the Statement of Operations and Changes in Net Assets reflects the difference between the cost and proceeds from securities sold, including the market as well as the currency impacts.
- **Transaction costs** - The transaction costs include broker fees and fees charged by the custodian for securities and derivatives transactions. The transaction fees are excluded from the cost of securities and derivatives purchased and sold. All these fees are recorded under caption “Broker and transaction fees”. Refer to note 14 which describes the reception and transmission of orders fees.
- **Contracts for difference** - At each valuation date, the difference in price between the opening price and the current market price of the underlying security or index to the CFD is recorded as the market value (unrealised gain or loss) of the contract; when the Sub-Fund enters a closing transaction, the difference between the opening notional amount and the closing notional amount of the underlying security is recorded as a realised gain or loss. Initial margin deposits may be made in cash upon entering in CFD. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open CFD contracts.

11 RECEPTION AND TRANSMISSION OF ORDERS FEES

Reception and transmission of orders fees are:

- paid to Amundi Intermediation or to Amundi (UK) Ltd, for their services rendered to sub-funds managed by Amundi which consist in centralizing orders and in supporting their best execution.

- accrued daily and paid quarterly on the basis of the transactions handled by Amundi's related parties.

Compared to an investment manager negotiating transactions on his own, the centralization of order enables namely to negotiate better prices with the brokers thanks to an increase of transactions volume, to have access to a larger number of brokers and to more market information, to benefit from the know-how of trading specialists and dedicated trading controllers.

These fees are recorded under caption "Reception and transmission of orders fees" in the Statement of Operations and Changes in Net Assets.

16 SWING PRICING

Since January 2016, a Swing Pricing policy has been implemented in the Fund.

Significant net inflows or outflows in a Sub-Fund cause the Investment Manager to trade the Sub-Funds' securities, thereby incurring trading costs.

With Swing Pricing, a Sub-Fund's Net Asset Value per share is adjusted to account for trading costs incurred where shareholders' subscriptions or redemptions activity exceeds a Sub-Fund's predetermined threshold. Swing Pricing is a mechanism of valuation which adjusts (swings) a Sub-Fund's Net Asset Value per share to account for these trading costs.

The aim is to protect the interests of non-dealing shareholders by ensuring the shareholders making significant subscriptions or redemptions contribute to the cost of their transactions.

Market conditions, trading costs and other Sub-Fund's data are used by the Management Company to determine which Sub-Fund's Net Asset Value per unit may be affected by Swing Pricing, and the appropriate threshold and swing factor to be applied for each Sub-Fund. These are reviewed by the Board of Directors of the Management Company on a periodic basis.

The Swing Factor may not exceed 2% of Net Asset Value as outlined in the prospectus.

During July 2020 – December 2020, Swing Pricing adjustments were applicable on the Net Asset Value per unit of the following Sub-Funds:

Sub-funds respect at all time the constraint "Cash received as collateral of OTC contracts and repurchase agreements has to be higher than the sum of deposits with credit institutions, investments in high-quality government bonds, reverse repurchase transactions with credit institutions and investments in short term money market funds". Cash is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash.

Collateral granted by the sub-funds in the context of repurchase agreements are held on segregated accounts.

The income and transaction costs of the securities under repurchase agreements, due to CACEIS, are included in the caption "Income on Reverse Repos" and "Expenses on Repos" in the Statement of Operations and Changes in Net Assets, for each Sub-Fund.

All transactions are bilateral transactions.

For each counterparty and each sub-fund, collateral positions are followed-up globally for all OTC instrument types.

Cash collateral is managed as a whole; the investment management process does not specifically isolate cash received as collateral from other cash.

Returns and costs incurred from performance swaps transactions during the period ended 31 December 2020 are included in the valuation of the swaps.
